ABSTRACT

5 The present invention provides a method for
preparing a hair dermal papilla cell preparation
comprising preparing a cell suspension by removing
epidermal tissue from skin tissue and subjecting the
resulting dermal tissue fraction to collagenase
treatment, and cyropreserving the cell suspension to kill
the follicular epidermal cells. The present invention
10 also provides a composition for regenerating hair
follicles comprising hair dermal papilla cell and
epidermal cells, wherein the ratio of the number of hair
dermal papilla cell to the number of epidermal cells is
from 1:10 to 10:1.
